## EXPERIENCE

**SNAZZY** | FULL STACK WEB DEVELOPER | BANGALORE, INDIA

January 2023 – Current | JavaScript | React.JS | Next.JS | Golang | DynamoDB | AWS

- Transitioned from sole frontend developer to a versatile full stack role, utilizing Golang. Enhanced backend service with new features, improved treatment tracking, integrated Razorpay webhooks, and resolved bugs.
- Single-handedly developed a multi-page company website for an organization in the teeth aligner industry, ensuring a seamless and visually appealing user experience.
- Assisted in improving collection and retention processes, and contributed to growth and marketing initiatives.

**SNAZZY** | FRONT-END WEB DEVELOPER | REMOTE

December 2021 – December 2022 | JavaScript | React.JS | Next.JS

- Optimized performance of a patient treatment progress tracking and payment portal, enhancing responsiveness and efficiency.
- Implemented server-side rendering for specific parts of the React-based patient portal using a custom Webpack and Node server setup.
- Took ownership of the development and maintenance of an internal dashboard, leveraging my skills to build a robust and user-friendly interface.

**HABBIT CO.** | FRONT-END DEVELOPER INTERN | REMOTE

July 2021 – September 2021 | Next.JS | TypeScript | Mixpanel

- Worked in an organization focused on streamlining skill acquisition.
- Developed and optimised web pages and analysed page metrics using tools such as Mixpanel.

## PROJECTS

**CEREBRO 2021** | FRONT-END DEVELOPMENT 

2021 | React.JS | SCSS

- Institute's Official Technical Fest Website
  - Implemented Authentication Page along with Google Auth.
  - Developed pages such as homepage, events page and team page.

**ANIVIOR** | FRONT-END DEVELOPMENT 

2021 | React.JS

- A portal dedicated to helping stray animals
  - Built forms for reporting stray's information and location or for NGO to register.
  - Integrated maps showing stray's location and details.

**TASK MANAGER** | BACK-END DEVELOPMENT 

2021 | Node.JS | MongoDB | Jest

- REST APIs for task management system
  - Implemented features like Authentication and email services.
  - Used Jest for writing automated tests.

**CHAT APP** | BACK-END DEVELOPMENT 

2021 | Node.JS | Socket.io

- A Multi-Room Chat application
  - Built a real-time chat app for instant messaging and multi-user communication.
